PROJECTS

• DEVELOPING AN AI POWERED VIRTUAL ASSISTANT USING PYTHON

Spearheaded the successful implementation of a Python-driven virtual assistant project, revolutionizing customer interactions by incorporating NLP and speech recognition; streamlined support processes, resulting in a 30% decrease in average handling time and a 20% increase in first-call resolution rate.

• HOUSE PRICE PREDICTION USING MACHINE LEARNING LINEAR REGRESSION

Orchestrated the implementation of a cutting-edge machine learning initiative, employing linear regression to construct a highly effective model for forecasting house prices. By incorporating a wide range of features, the model produced precise estimations, greatly enhancing the decision-making process for real estate professionals. Resulted in a 50% reduction in pricing errors and empowered strategic investment decisions.
